Webster's New World Spelling Checker

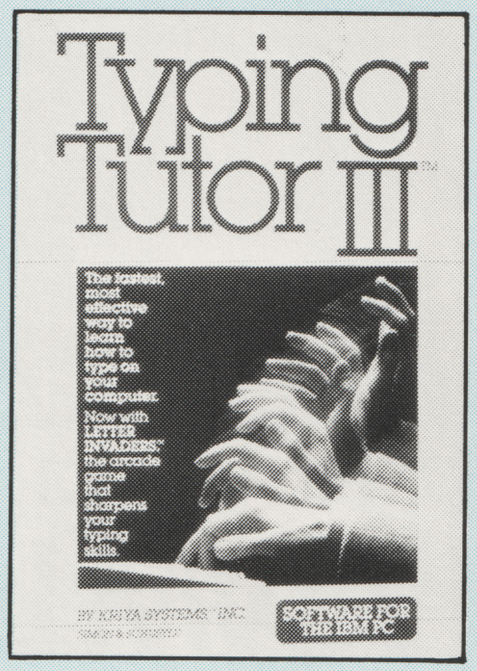
"The best proofreading software on the market."
—Henry Kisor, Chicago Sun Times

Most spelling checkers simply red flag typos. Then, some leave you with a list of alternatives a mile long. But **Webster's** not only finds your misspelled words, it corrects them *while you watch.* It also corrects transpositions, contractions, hyphenated words, repeated words, and run-ons. Compare. No other spelling checker can match it. Compatible with most major word processors and software packages.

Available for IBM PC, PC-XT, PCjr, Apple II+, IIe and IIc.

Typing Tutor III™

by Kriya Systems, Inc.

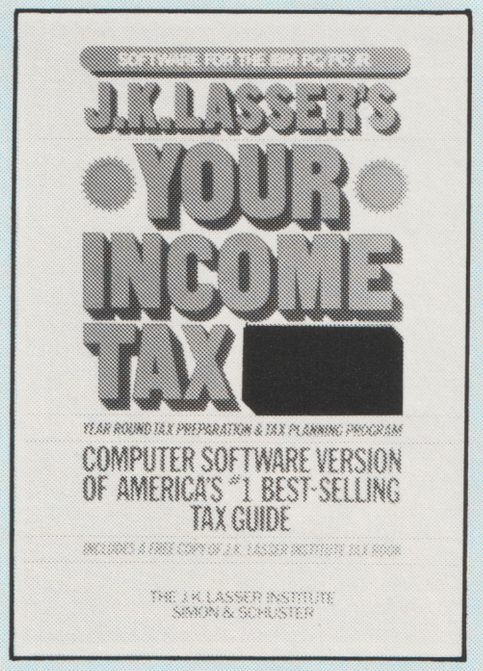


"The best typing instruction program for personal computing that I have seen."
—Erik Sandberg-Diment, New York Times

Already hailed as the #1 educational software program on the market, **Typing Tutor III** is the fastest, most effective way to learn to type on your home computer. The program adjusts itself to your level—*automatically*—giving you customed-designed lessons that test your strengths and weaknesses. It also features **Letter Invaders,** the arcade-style game that gets faster as your typing gets better.

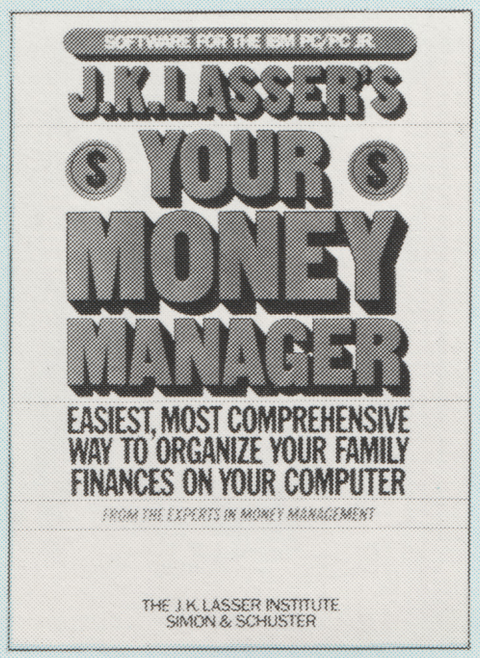
Available for IBM PC, PC-XT, PC/AT, Apple II+, IIe, IIc, Commodore 64 and Apple Macintosh.

J.K. Lasser's Your Income Tax— Software Version—1986



Now the #1 bestselling tax guide in America is available for use on your home computer. With **J.K. Lasser's** you can ask speculative "*what if*" questions about taxes, perform supplemental calculations with the help of an onscreen calculator, evaluate various tax strategies, and do virtually anything a professional tax preparer can do. Plus, bound into every software package is a copy of the book, **J.K. Lasser's Your Income Tax**—absolutely free.

Available for IBM PC, PCjr, Apple II+, IIe, IIc, Commodore 64 and Apple Macintosh (Available 12/85).

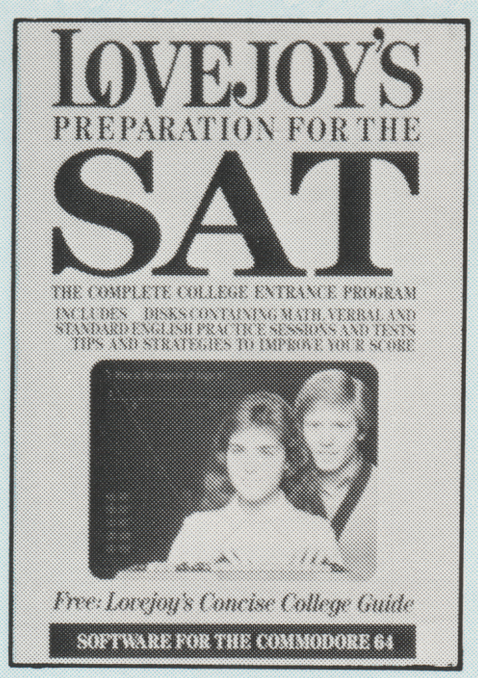


J.K. Lasser's Your Money Manager

It doesn't take a financial expert to realize that having the money you need when you need it requires more than just a healthy income. It takes planning. That's why **J.K. Lasser's Your Money Manager** offers you all the tools you'll need—easy-to-use transaction windows, simple account reconciliation, automatic calculation and a wide selection of graphs. And, with the help of a printer, **Your Money Manager** can prepare and print all your financial reports instantly. Plus, you can transfer the information in **Your Money Manager** to **J.K. Lasser's Your Income Tax—Software Version,** making your tax preparation as painless as possible.

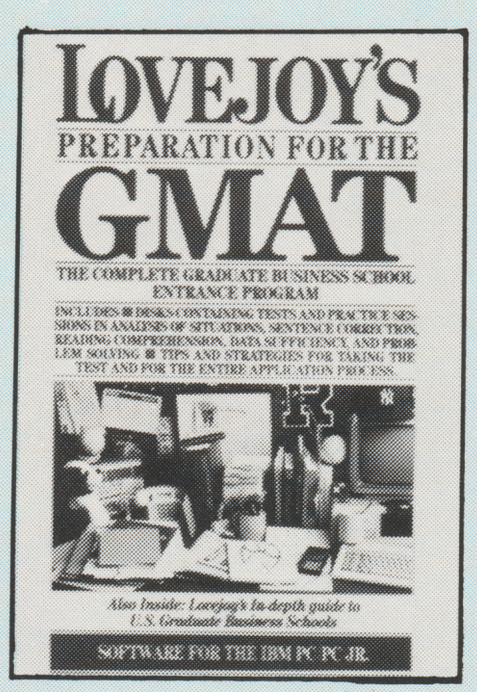
Available for IBM PC, PC-XT, Apple II+, IIe, IIc, Commodore 64 and Apple Macintosh (Available 11/85).

Lovejoy's Preparation For the SAT



Why take chances with your future—especially when you already own a computer? **Lovejoy's** is the bestselling computerized SAT course on the market. Why? Because it explains exactly *why* your answers are right or wrong. It features two sample exams, 27 practice modules, extensive "help" screens, an onscreen scratch pad and calculator, testing tips, strategies and more. Plus, bound into every package is a copy of **Lovejoy's College Guide.**

Available for IBM PC, PC-XT, PCjr, Apple II+, IIe, IIc and Commodore 64.

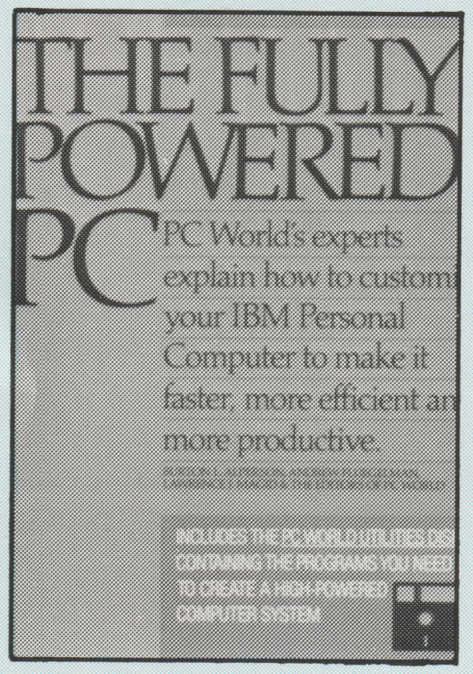


Lovejoy's Preparation For the GMAT

by Waterside Productions

Relying on memorization and rote learning to pass the GMAT is no way to insure your acceptance to a top business school. **Lovejoy's Preparation for the GMAT** allows you to learn while you study by telling you exactly why your answers to sample questions are right or wrong. **Lovejoy's** includes two practice exams (fully timed by an onscreen clock), 20 sample modules, extensive "help" screens, an onscreen scratch pad and calculator, bar graphs and test strategies.

Available for IBM PC, PC-XT, PCjr, Apple II+, IIe, and IIc (Available 11/85).

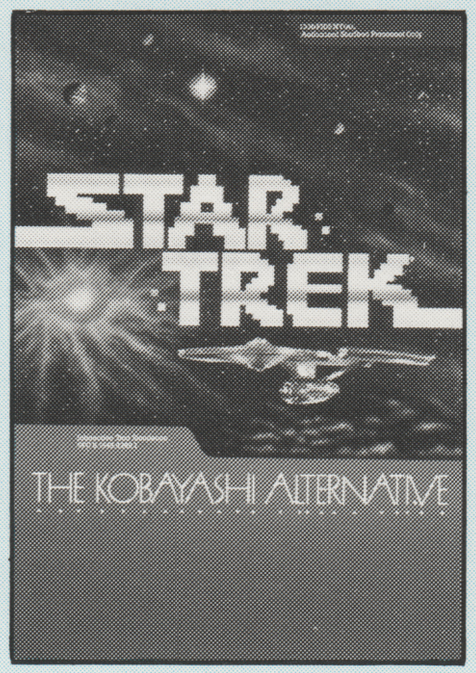


The Fully Powered PC

A veritable "turbocharger" for your PC, **The Fully Powered PC** contains all you need to make your IBM PC faster, more efficient and more productive. The experts at *PC World* will show you how to adapt ready-to-run systems or construct your own—giving you the ability to call up any of a dozen multipowered applications with little more than a single keystroke.

Available for IBM PC, PC-XT, PCjr.

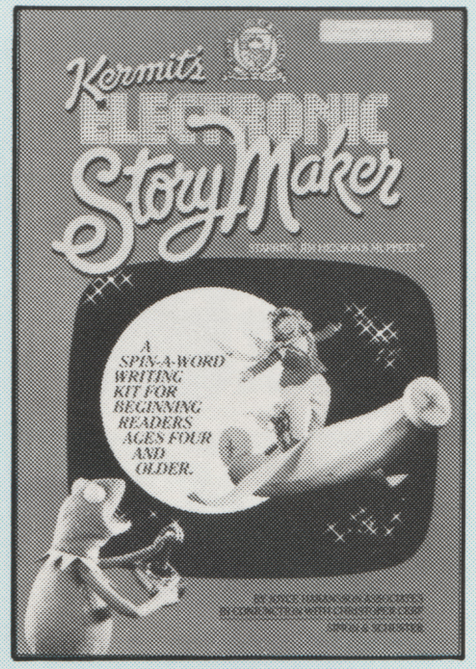
Star Trek
The Kobayashi Alternative



This interactive text adventure lets you plot the course of the Enterprise to more than 100 different planets and star systems. Select landing parties, call on the aid of your crew, contact strange alien civilizations and command the Enterprise to stop the Klingons from taking over the galaxy. Produced in cooperation with the original creators of **Star Trek**—this program features a revolutionary "personality database" for each of the familiar **Star Trek** characters.

Available for IBM PC, PC-XT, PCjr, Commodore 64, Apple II +, IIe and IIc.

More on back . . .

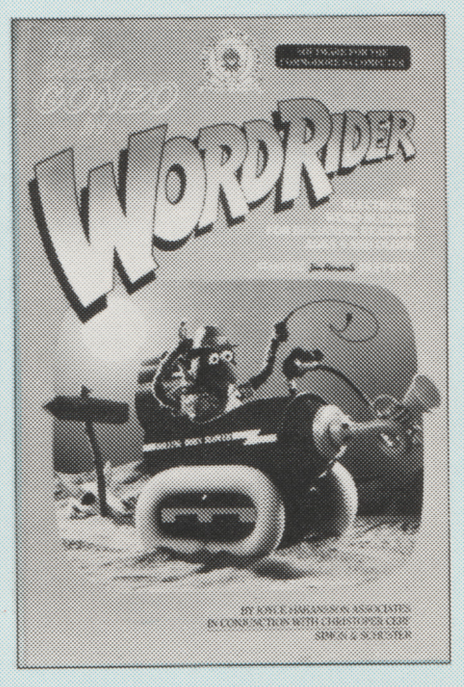


Kermit's Electronic Storymaker

With **Kermit's Electronic Storymaker,** children (ages 4 and up) will create their own animated stories using the Muppets as actors! Kermit, Miss Piggy, Gonzo and the rest can be made to dance, fly spaceships, or sail boats in settings from the ocean floor to the surface of the moon. While your child is using his imagination he will also be learning the rudiments of sentence structure and building his vocabulary.

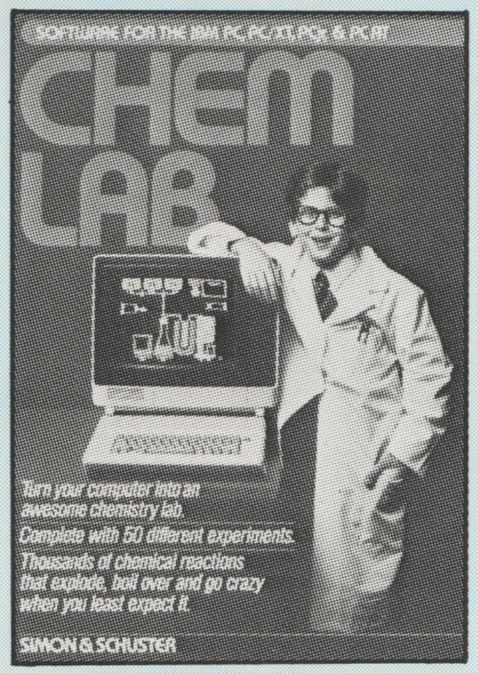
Available for Commodore 64, Apple II, II+, IIe and IIc.

The Great Gonzo In Wordrider



In yet another Muppet adventure, children (age 5 and up) must overcome obstacles by combining nouns and adjectives to build animated vehicles—Climbing EggCatchers, Flying Water-Squirters, Bouncing Hole-Makers—and then maneuver these vehicles through a variety of funny perils. The paths and obstacles keep changing and the number of points needed to win keeps increasing—so kids can stretch their creative potential while learning and having fun.

Available for Apple II, II+, IIc and Commodore 64.



Chem Lab

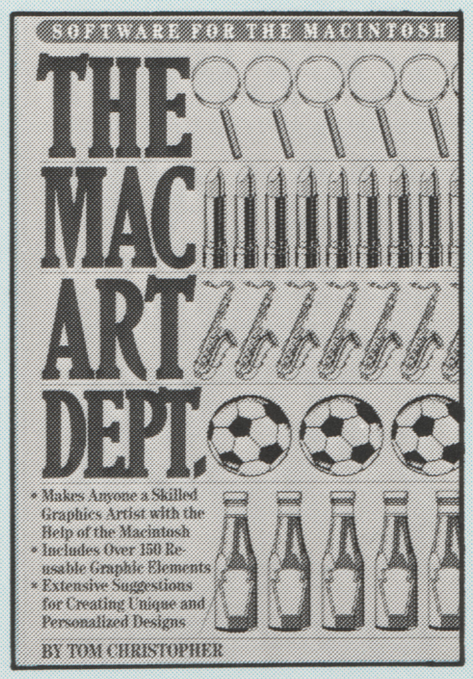
Puts young chemists (ages 9–13) in charge of a computerized chemistry laboratory. It has everything the old-fashioned chemistry sets had—bunsen burners, heat and pressure chambers, separate dispensers for gas and liquids—all without the mess and smell. Over 50 experiments structured as amusing problems of varying degrees of difficulty. But be careful . . . combine the wrong chemicals, and the image on the screen explodes!

Available for IBM PC/PCjr, Apple II + /IIe/IIc and Commodore 64.

The Mac Art Dept

With the **Mac Art Dept** you can use your imagination to create personal stationery, letterheads, newsletters, flyers, posters . . . any printed material. An easy-to-use manual explains how to take over 100 images—from household objects, intricate borders to travel images, illustrations of food, musical instruments, and more—and modify them to suit your individual needs.

Available for Apple Macintosh.



The Great International Paper Airplane Construction Kit

Using the graphic capabilities of the Macintosh and MacPaint software, this program lets you choose from over a dozen full page airplane designs. Embellish the wings, furnish the planes with windows, hatches, landing gear, engine covers . . . even a pilot. Then, print your creation on the Imagewriter printer, fold . . . and take off!

Available for IBM PC, PC-XT, PCjr, Apple (ProDOS Only), Commodore 64 and Apple Macintosh.
